

THE STERILE AWARE ARC OF MEDICAL DEVICE DELIVERY TO PATIENT

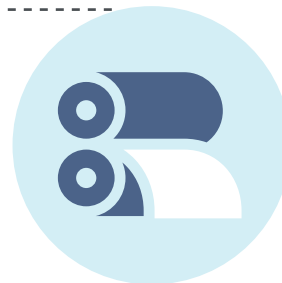

"SterileAware™ means understanding every touch and stopping point on a medical device packaging systems journey to the patient's bedside. From material, machines, method and the human connection we must remain mindful of how we connect to patient safety. Our outreach, products and services will help support the safe and sterile delivery of your medical devices. As the higher value sterile packaging Zeitgeist continues to bloom, we will be here to support this movement, to keep us all Sterile Aware...

Material Science that builds the bonds for medical device packaging systems.

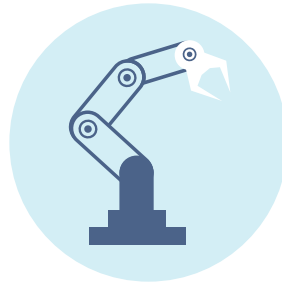

01

02

Pouch converters engendering durable and vetted packaging for the MDM's.

03

Medical device makers that package with compliant machinery, and protocol.

Hospitals and clinics that carefully handle and store sterile medical devices.

04

Pouch opening and handling procedures that maintain device sterility.

05
